

## **Sunoco Pipeline statement on PA DEP consent order and agreement**

Feb. 8, 2018— Today we entered into a consent order and agreement with the Pennsylvania Department of Environmental Protection that allows us to resume construction on the Mariner East 2 pipeline.

While we strongly disagree with their legal conclusions that our conduct was willful or egregious, we felt it was important to our unit holders and to the Commonwealth of Pennsylvania that we move forward rather than engage in continued litigation. We are committed to fully complying with the DEP order, which includes following all permit requirements.

Our willingness and ability to comply was acknowledged by the DEP in the consent order and agreement. Safety is paramount for any energy infrastructure project we do – the safety of the communities in which we work and operate, the safety of our employees, and the safety of the environment.

Mariner East 2 is critical to Pennsylvania's economy, and resumption of construction will put thousands of workers back on the job. With mainline pipeline construction approximately 93 percent complete and horizontal directional drilling approximately 64 percent complete for in-service, we look forward to completing the Mariner East 2 project safely and beginning service in a timely manner.
